

# Cornerstone Software Ltd

Cornerstone Software® helps businesses get more out of their information systems by providing advice, problem solving and practical solutions.

Cornerstone Software was founded in 1992 and is owned by experienced software specialists with a passion for what they do – which is helping you get the best out of Information Technology. Our consulting service provides you with clear ideas of how to realise value from IT whether through custom-built or off-the-shelf software applications. We help you ensure that your IT systems are used effectively and save time for you, your staff, your customers and suppliers.

We achieve this based on our extensive experience with small business to large corporates:
